

Limitations of the Lite version

Circuits:

- The number of nodes in the circuit is limited to 10,
- The number of components in the circuit (without circuit ports or sources) is limited to 10,
- The number of circuit ports is limited to 10,
- The number of ports that any component can have is limited to 10.

3D EM structures:

- The number of unknowns in 3D EM projects is limited to 665,
- The number of nodes within a 3D structure is limited to 1000,
- The number of elements of a 3D structure is limited to 1000,
- The number of excitations is limited to 1000.
